EDUCATION

Anáhuac Oaxaca University

Bachelor of Information technologies and digital business engineering

Oaxaca de Juárez, Oaxaca

Aug. 2024 – Aug. 2028

CERTIFICATIONS & COURSES

Computer Hardware Basics | *Cisco*

Sept. 2024

JavaScript Essentials | *Cisco*

Oct. 2024

HTML Essentials | *Cisco*

Jul. 2025

HackerRank Java Skills Verification | *HackerRank*

Nov. 2025

Artificial Intelligence with Machine Learning in Java – English | *Oracle*

Nov. 2025

HCIA-openEuler V1.0 Course | *Huawei*

Jan. 2026

C++ Essentials 1 | *Cisco*

March. 2026

HCIA-openGauss v1.0 Course | *Huawei*

In progress

HONORS & COMPETITIONS

Huawei ICT Competition | *Latin American Finalist (Computing Track)*

April 2026

- Selected among top students in Latin America to compete in cloud computing and network infrastructure topics.

ICPC (International Collegiate Programming Contest) | *Mexico Region Participant*

Jun 2025 – Sept 2025

- Solved complex algorithmic problems under time pressure using C++ and Java.

PROJECTS

Decision Tree Game Engine | *Java, Data Structures, AI Concepts*

Aug. 2025 – Sept. 2025

- Developed an interactive console-based game in **Java** utilizing decision trees to simulate basic Artificial Intelligence behavior.
- Implemented a learning algorithm that expands the decision tree based on user input, allowing the game to 'learn' new objects.
- Designed a recursive search mechanism to traverse nodes efficiently and predict user choices with high accuracy.

Simple Battle Arena RPG | *Java, Maven, Multithreading*

Oct. 2025 – Dec. 2025

- Built a multiplayer RPG engine in Java applying core OOP principles: **Polymorphism**, **Encapsulation**, and **Hierarchy**.
- Implemented **Java Networking (Sockets)** and **Multithreading** to handle real-time game state synchronization.
- Managed project dependencies and build lifecycle using **Maven** to ensure code stability.

Personal Website Blog | *Java, Spring Boot, React, Docker, PostgreSQL*

Present

- Developed a full-stack blogging platform using **Spring Boot** for the REST API and **React** for the frontend.
- Integrated a **PostgreSQL** database specifically configured within a **Docker** container for data persistence.
- Implemented Git for version control and deployed the application architecture using JSON for data interchange.

SKILLS

Technical Skills

Languages: Java, C++, Python, SQL, JavaScript

Competitive Programming: Data Structures, Algorithms (ICPC Participant).

Frameworks: Spring Boot, React, Bootstrap

Tools: Git, Docker, Linux (openEuler, Ubuntu), Databases(Postgres and Open-Gauss)

Soft Skills

Leadership (Team Lead)

Critical Thinking

Problem Solving

Effective Communication
